

Main - Presentation

From the presentation page, instructors can control all of the student stations within the room. To control a station, instructors must start by selecting a station on the left. Instructors will be able to tell if a student station has requested to speak, and the order of the requests, by the index bubble on the upper left corner of the station select buttons.

Upon selecting a station, instructors can control the station with the controls in the middle of the screen. Instructors can choose what is being displayed on the station's monitor. The instructor will also have the ability to lock, mute, and adjust volume for the selected station.

Instructors will also be able to control their own workstation by using the on-screen controls to the right. Instructors will be able to control what content they are viewing, and will have global controls to apply changes to all the student stations at once.
