

Presentation steps

1. Touch the blank screen to awaken the system.
The Initial page lists a few quick task modes to minimize setup time.
2. Select **Presentation Mode**. The PC will be routed to the projector.
If equipped the room's electronic projector screen will lower into position.
3. After the projector warms up you will be ready to present.

(Touching the screen avoiding the icons takes you to the main menu)

If you end up at the main menu selecting Room PC will project the PC's display onto the projector. If equipped the room's electronic projector screen will lower into position.

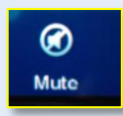

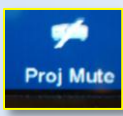

If selecting another source the signal will be sent to the projector. If equipped the room's electronic projector screen will lower into position.

Press Room Off & select Yes to power down the system.

Blanks projector screen when needed The icon will show a blinking slash when muted.

Main Volume and Mute controls. The mute button will show a blinking slash when muted.

Power down after use

The image shows a dialog box with the text 'Are You Sure You Want To SHUTDOWN The System?' and two buttons: 'Yes' and 'No'.

The projectors cool down prior to shut off and will take a few minutes to restart if needed. Be sure your session at an end.
